Journals		De	Hasta	Vol - inicial	Vol - Actual	Descripción
1	ACM Computing Surveys (CSUR)	1969	2008	1	40	These comprehensive, readable tutorials and survey papers give guided tours through the literature and explain topics to those who seek to learn the basics of areas outside their specialties. The carefully planned and presented introductions in Computing Surveys (CSUR) are also an excellent way for professionals to develop perspectives on, and identify trends in complex technologies. Recent issues have covered image understanding, software reusability, and object and relational database topics
2	ACM Journal of Computer Documentation (JCD)	2000	2002	24	26	Provides a forum on documentation and user support for computer products and systems. Past issues have published topics on processes, methods, and technologies for on-line text, hypermedia, and multimedia.
3	ACM Journal on Emerging Technologies in Computing Systems (JETC)	2005	2008	1	4	Covers research and development in emerging technologies in computing systems. Major economic and technical challenges are expected to impede the continued scaling of semiconductor devices. This has resulted in the search for alternate mechanical, biological/biochemical, nanoscale electronic, and quantum computing and sensor technologies. As the underlying nanotechnologies continue to evolve in the labs of chemists, physicists, and biologists, it has become imperative for computer scientists and engineers to translate the potential of the basic building blocks (analogous to the transistor) emerging from these labs into information systems.

4	Journal of Experimental Algorithmics (JEA)	1996	2008	1	12 Is the first publication devoted entirely to experimental work in algorithms and data structures. <i>JEA</i> is also the first on-line-only journal published by ACM, and it is available through a variety of protocols including http, ftp and ftpmail.
5	Journal of the ACM (JACM)	1954	2008	1	55 Serves as a venue for careful presentation of theoretical research in the core areas of computing: complexity of algorithms, computer architecture, system modeling, AI, data structures, database theory and graph theory, to name a few. The authors are world class scientists, writing to other scientists about advances, methods and findings behind the fundamentals.
6	Journal on Computing and Cultural Heritage (JOCCH)	2008	2008	1	1 Publishes papers of significant and lasting value in all areas relating to the use of ICT in support of Cultural Heritage
7	Journal on Educational Resources in Computing (JERIC)	2001	2008	1	8 Is an electronic publication providing access to high quality, archival resources suitable for use in support of computing education. Resources include scholarly articles with wide applicability and potential impact as well as multimedia and visualization resources, laboratory materials and other materials of practical use in support of learning in the computing sciences.

Magazines		De	Hasta	Vol - inicial	Vol - Actual	Descripción
8	Communications of the ACM	1958	2008	1	51	Is the premier chronicler of computing technologies, covering the latest discoveries, innovations, and research that inspire and influence the field. Each month, Communications brings readers in-depth stories of emerging areas of computer science, new trends in IT, and practical research applications. Industry leaders choose Communications to debate technology implications, public policies, engineering challenges, and market trends.
9	Computers in Entertainment (CIE)	2003	2008	1	6	Boasting an editorial board of more than 100 industry and academic leaders in media, communications, special effects, and R&D, Computers in Entertainment covers a wide range of theoretical and practical computer applications in the field of entertainment. It features video interviews of leading professionals. It publishes high-quality papers on the latest development in software, hardware, and business policies that improve existing mainstream entertainment and that create new genres of entertainment. Topics of interest include but are not limited to: animation, animatronics, digital asset management, digital cinema, digital rights management, games, interactive television, Internet, movies, music, performing arts, robotics, toys, and virtual reality. The Editor-in-Chief is Newton Lee of Disney Online.
10	Crossroads	1994	2008	1	14	Is the ACM student magazine, available free to all ACM student members. Crossroads provides students with accessible articles on a wide range of computer science related topics and a forum to share work with others.

11	Queue	2003	2008	1	6	Is a publication for software engineers that frames and defines the technical problems and challenges that loom ahead, helping readers to sharpen their own thinking and pursue innovative solutions. <i>ACM Queue</i> does not focus on either industry news or the latest "solutions." Rather, <i>Queue</i> articles explore technologies that are just on the verge of making a disruptive difference, highlighting problems that are likely to arise and posing questions that software engineers should be thinking about.
12	StandardView (Cerrada)	1993	1998	1	4	Producers and users of standards in business, government research, and academia will benefit from practical and theoretical information in <i>StandardView</i> on all aspects of standardization, with an emphasis on how standards affect the daily work of all information technology professionals
13	Ubiquity	2000	2008	1	9	Weekly Web-based publication, dedicated to fostering critical analysis and in-depth commentary on issues relating to the nature, constitution, structure, science, engineering, technology, practices and paradigms of the IT profession
14	eLearn	2001	2008	2001	2008	A not-for-profit educational association serving those who work, teach, and learn in the various computing-related fields. Founded in 1947 as the Association for Computing Machinery, ACM's stated mission is to advance the arts, sciences, and applications of information technology. It is the oldest and most respected organization of its kind
15	intelligence (Cerrada)	1970	1989	issue 24	issue 110	Features new writing and ideas from a broad spectrum of the AI community. This magazine was formerly <i>SIGART Bulletin</i>
		1990	2001	1	12	

16	interactions	1994	2008	1	15 Is a magazine intended for professionals interested in the connections between experiences, people and technology. The human-built world can afford a sense of beauty, sublimity, and resonance, and through our advancements in technology can come advances in society. At the center of these advances are interactions —conversations, connections, collaborations, and relationships — within and across multiple disciplines, with and without technology. This magazine includes timely articles, stories, and content related to these interactions
17	netWorker	1997	2008	1	12 Delivers the latest on technologies and trends to its audience of practitioners, designers, business managers and others plugged into the networking culture. The magazine also publishes a Web site that culls selected articles from the print version, and additionally features material specially tailored for Internet readers
